Student Succes Story

Amanpreet Singh

Just after a year of experience, when my counterparts are still getting hold of the industry, Geekster had already skyrocketed my career! Thank you wonderful mentors and trainees at Geekster for honing my skills and instilling so much confidence in me.

Bhavesh Gupta

The undue pressure of landing a job after college was frustrating, and the underpaid interships only made me feel underappreciated. But then I stumbled upon Geeskter which not only helped me upskill but also made me interview ready. I am glad I choose Geekster, and would recommend it to my other friends too.

Kushagra

These guys are amazing. From the time of joining to the time of getting a placement, they took care of everything. I was not worried at all about finding placement opportunities. The course is one of the best to learn full-stack.

Vijyant

My most dreaded subject has always been Java but with Geekster learning was so smooth. The mentors helped me learn complex concepts so easily and the insights about the industry were very helpful during my interview. I am really thankful to them for helping me.

Frequently Asked Questions

1. What is the medium of instruction?

The medium of instruction is English. All lectures are delivered in English. As part of the curriculum, we also help you develop your verbal communication skills that help you become more employable.

2. Will I receive a degree or certificate when I complete the program?

We do issue a certificate of completion when you clear all the modules. Geekster is not a degree institution and we do not grant Bachelors or Masters Degrees. The core focus is on skill development and holistic learning. We believe skills > degrees.

3. What do I do if I don't have a Pan Card/Adhaar Card?

At the time of admission, having an Aadhaar is mandatory. PAN Card is not mandatory at the time of admission, but you will need to get a PAN number before you move to Unit 2.

4. Do I have to take the first job I am offered?

No, we do not control where you choose to work. However, we do recommend not over-optimising your job search and getting a job as soon as possible. Once you reject an offer, you cannot go back to it if the position is filled.

5. What will be taught in this program?

We teach Full stack web development in MERN stack from scratch. Even If you don't know anything about coding, by the end of this you will be able to develop a fully functional website.

6. I know the basics and only want placements. Can I join the course?

You can enrol in our course and clear the Module Clearance Tests. If you clear them, we will directly refer you to companies.

7. What is the 100% money back guarantee?

Our confidence in our offerings allows us to give you a 100% money back guarantee. We will refund the entire fee of this program if complete the program and don't get a job. You can read more about it here.

8. What package can I expect to get upon completion of this program?

If you complete the entire program we commit a minimum of INR 5LPA placement. Should you chose to take a job after completing the 5th module, we still commit a minimum of INR 3LPA placement.

9. Can someone who has 2 years gap after his graduation and doesn't have a job for this year, apply for the course?

Yes, absolutely!

10. Am I eligible for this course if I'm from a non-technical background?

Yes, you're absolutely eligible to apply for our Full Stack Web Development Program. You'll be trained on the necessary technical skills so that you can pivot to a technical career.

YOU ARE JUST A STEP
AWAY TO KICKSTART
YOUR TECH CAREER
