STUDENTS SPEAKS

I'm an investment banker who studied to be an engineer!

Can you believe it? I graduated in civil engineering and after four taxing years of college, began looking for a job. The thing is – a small part of my always knew I was passionate about finance and wanted a career in it, but the transition was daunting.

I was looking for an avenue to an investment banking job when a friend recommended Imarticus. I did not face any major roadblocks and could keep up because of the exceptional faculty and the detailed curriculum.

A highlight was the placement services – through mock interviews and resume building, the trainers helped me hone my skills. Who would have imagined that I'd land a job at SS&C Globe Op even before completing the course? My job involves much of what I learned at Imarticus, and I couldn't be happier.
